

VARIANTS END PREPARATION

Semperit handrails are tailored to your specific application and available in a great variety of different pre-fabricated styles for quick and easy installation.

EL - endless

Application: precise length of endless handrail is known; it is installed as endless handrail; no further vulcanisation needed.

EO – one end prepared

Application: precise length is not known; one end with a prepared end and the other fully cured and cut straight. On-site vulcanisation.

BO – both ends prepared

Application: precise length is known but cannot be installed as endless handrail, fast and easy splice, on-site vulcanisation.

BG – Both ends vulcanised

Application: precise length of the endless handrail is not known beforehand, usually taken from reels (e.g. 400m), both ends must be prepared, spliced and vulcanised on-site.

All specifications, numbers, calculations, test values, and data mentioned here – which are the basis for our customer consultation – are in accordance with the latest engineering standards. As the operating conditions have an influence on product application, it is the sole responsibility of the customer to check the application conditions of each individual case, and whether the specified quality criteria of our products are adequate for the intended purpose. Improper use, excessive loading, or exposure to impermissible media can impair the product's function. The pictures and graphics shown are only representative images.
